Paint Bar Forex System PBF Xtremes secret is that it maximizes your profit potential by entering at the beginning of the trade. The earlier you ride the trend, the higher your profits. PBF Xtreme excels at predicting the beginning of a trend moments before it materializes. That's not all. You'll never leave money on the table again by exiting a position too early. I've built in a clever sub-indicator that predicts when the market will turn, allowing you to squeeze every pip out of your trade.
