

New Trading Software Super Trend Profit

[DOWNLOAD HERE](#)

The Super Trend Profit indicator does NOT REPAINT! Works on any day trading time frame and any Forex pairs An amazingly designed tool that WONT let you lose a trade EVER again How it works? - RED line-sell, BLUE line-buy. Now it is that easy and pleasant at each time you trade! How does the indicator actually work? 1. Pick a Forex pair or a stock that you'd like to trade. Open a chart. 2. Choose your time horizon: M15, M30, 1H, 4H (although this indicator is not made especially for scalping trading - works perfectly fine on M1, M5 timeframes too!) 3. Whenever you get an alert popup with buy or sell signals (blue or red line) - you decide whether or not you want to enter the trade. 4. Exit point and Stop loss will be PRINTED in the alert window! Take Profit and Stop loss - calculated Automatically and printed in the popup and email alerts What Will You Receive After Purchase ? Super Trend Profit Indicators (2 Files EX4 For 5 digit and 4 digit broker) Super Trend Profit User Manual (PDF)
