

Arcsoft Low Light Nr

[DOWNLOAD HERE](#)

ArcSoft Low Light NR is an innovative image noise reduction application based on the latest Multiple Frame NR technology (MFNR). Using sophisticated algorithms, it combines multiple frames to produce one high-resolution image, acquiring more graphic information than it is available from any single photograph. It greatly reduces the visible noise while improving the image quality efficiently by processing sets of photographs taken in burst mode.

ArcSoft Low Light NR specifications: Download Size: 11145 KB
Other System Requirements: Other|Pentium IV 3.0 GHz or above or Equivalent AMD Athlon, 2G DDR2 RAM or above
ArcSoft Low Light NR supportSupport email: support@arcsoft.comPhone: 510-979-5599
