

Great Metatrader 4 Forex Indicator

[DOWNLOAD HERE](#)

BvB Power - Bulls vs. Bears - Great MetaTrader 4 Forex Indicator Each time the indicator calculates 2 lines, green for the bulls (uptrend) and red for the bears (downtrend) * If the red line crosses the green line, then the possible trend shift from uptrend to down trend may be in play, and vice versa * The bigger the difference between the red and green lines, the bigger trend strength in either direction * The biggest fight between the bulls and bears begins at the time when red and green lines are close together * You will receive two different types of this indicator - 1) the MultiDay BvB and 2) the intraday BvB which calculates the bulls and bears power within the current day from 00.00 The package you received should contain the following files: - BvB Power Indi.ex4 - BvB Power Indi IntraDay.ex4 - BvB Power lib.dll
