Dominate Google Instantly! Increase your rankings with T' Brand New Plugin For Wordpress What If I Told You There's A Smarter & Easier Way? With Just A Simple Plugin, You Too Can Achieve Top Rankings M &ogle Automatically Attaches To Your &ogle Plus From Any Page Or Post Getting your website or blog on the first page of Google isn't hard to accomplish when you have the right tools. It simply starts with the right software. Backlinks are the most important factor in search engine rankings and will be for many years to come. However, most people can't afford to spend thousands of dollars and hours upon hours of posting endlessly on forums and blogs that have low to no page rank. This plugin is

completely different than most of the useless garbage you find out there. Every time you create an article or write a post on your website or blog, this plugin will attach itself and give you not only backlinks, but set your site up as that all important Authority Site that gives you maximum results in Google. If someone searches for 'make money online' and finds your face on the first page - they are more likely to click it, even if they don't know you! Basic psychology rule (and I know because I research these things - noticing facial features allows closer relation and better accountability). Putting your face next to your blog post is important (unless you want to be anony-mous!) Numerous bloggers (yours truly included), are starting to use Google Authorship for their blogs. You should too. Do you know why? Because it takes less than 1.0 minutes to set it up and the 5E0 possibilities are endless. I will show you how in a moment. Most of us in online marketing spend an awful lot of time an effort trying to improve our search rankings in Google striving for that coveted #1 spot. Usually, the #1 spot gets approximately 42 of the search traffic to their site, while the #2 spot gets about 20. These are rough figures that come up again and again. Talking to people that have gone from #2 to #1, I've repeatedly heard that #1 gets three times more traffic than #2. And you're really not even in the game until you're in the top three. Keeping that in mind and looking at the Google Authorship program, what kind of advantage do you think it would be if you were maybe in the the Top #5 spot but had an image by your result? Do you think you might actually pull more traffic than the #1 spot? It's not only possible... It's Pretty Much Guaranteed! You would definitely pull significantly more traffic than a standard #5 listing without a picture. Go gle search Exerylln Was ShOPM9 Go ASI4N AuTomA" AneMeatogla .paname business sut
