Singer/songwriter lyric retroactive country/folk pop featuring elementary guitar and outspoken tracks. 10 MP3 Songs FOLK: Folk Pop, COUNTRY: Country Folk Bedroom Recordings Songs Details: I was so well-chosen when I finally got a adventure to head into a real studio and record full versions of twelve of my songs in 2003. But a funny thing happened when I released my CD, Old Horses: people started asking, where are all the new songs? Anyone who had my home-recorded CDs knew at least half of the songs on Old Horses. And what's more - they missed the intimacy of a elementary guitar and outspoken recording. So I made the decision to release songs I've never released before, in their raw form, and call it Bedroom Recordings - because that's exactly what they are. These songs were recorded late one night in my bedroom with my 4 track recorder. I added a few harmonies to some songs, but for the most part these were recorded and left as they turned out - flaws, flubs and all. Because if you've ever seen me play live, you know that's me - never perfect, sometimes tripping myself up, but honest. These recordings are honest representations of me. Hope you like them.
