So, what are mini sites? Mini sites are usually a 1-5 page website that focus on selling ONE thing. A product, service, promotion of a program, or any one thing you could ever want to sell or promote online. I have tried to make this ebook a definitive guide to marketing almost any type of mini site. It will be updated with the latest and greatest information on a continual basis. First, what you are selling or promoting via your mini site does not have to be yours. Personally I mainly promote my own products and services. I believe thats where the real money is. However, there are many people who promote other peoples products and service through affiliate programs and make quite a bit of money doing it that way.
