Fibonacci Miracle Trading system Fibonacci Miracle is a powerful Forex buy sell indicator that utilizes a formula based on the Famous Fibonacci number sequence. What makes this different from all the other wannabees out there? Well, not to put too fine a point on it, it actually works. This system gives you strong indicators for large moves, unlike other Forex indicator systems that dribble out tiny profit trades. The indicators are printed directly on your Forex charts, so you dont need to go through any other system just keep your regular charts up and wait for the bus and sell indicators to show up. One incredible highlight of the system is that it actually gives you a calculated stop loss suggestion, again printed directly onto the chart.
