

Forex Advanced Synergy Trading System

[DOWNLOAD HERE](#)

Advanced Synergy 2.0 A Forex trading method developed over 4 years to measure price action, trend, momentum, market strength, volatility, and dynamic levels of support and resistance. Most importantly, all of these measurements are placed into a simple-to-use trading format that can be applied on most any intraday or daily time chart. The Advanced Synergy method has been presented in Los Angeles, San Francisco, Dallas, Houston, Detroit, Orlando, Raleigh and Seattle. The basic Synergy model also has been shared over the Internet and within Forex trading forums by thousands of traders in over 100 countries. The SYNERGY method is designed to provide traders: Greater confidence in trading decisions. Better trading consistency. Less emotional trading from anxiety, fear, and stress. When all required conditions are satisfied, an audible alert and a GREEN, YELLOW, or RED arrow appear on the chart automatically. Using this one indicator can make a difference in your trading! The GREEN and RED arrows only appear on a chart when Buy or Sell conditions with good momentum are satisfied. The YELLOW arrows appear when momentum in a trade direction weakens. When all required conditions are met, arrows appear and audible alerts sound. Each alert includes the currency pair, time chart, market condition, and the local time of the alert. Arrows and Alerts continue until the trade has reached either a point of price reversal or exhaustion. This one incredible tool can make a major impact in your Forex

trading!
