

# Multiple Timeframe Momentum Indicator For Your Perfect Forex

[DOWNLOAD HERE](#)

This indicator works on MT4 platform and can be the greatest add on for your forex trading system or strategy. Instead of many indicators on your charts you can use one forex indicator which includes 3 Stochastic indicators of different scales/timeframes for you high probability forex trading system or strategy. What exactly this indicator shows? Blue line shows short term momentum of current price levels. Yellow line shows mid term momentum of current price levels. White histogram shows long term momentum of current price levels. Levels of 30 and -30 equals to levels of 80 and 20 of regular stochastic indicator and the indications above or below those levels shows overbought and oversold condition relatively. If you are familiar with multiple time frame trading, you already know how powerfull and accurate it can be. This indicator can reduce many distractions and be very valuable indicator for any of your forex trading systems. If used correctly it can bring you success that you have never imagined before.
