earthy yet ethereal, deeply elemental emotional sitar/guitar epic compositions with all organic drumming and shamanic vocals. 9 MP3 Songs WORLD: World Fusion, NEW AGE: Meditation Details: about arundas sala founded Arundas in 1998 after some years of forest dwelling and wandering here and there .. his experiences during those years would later form the concepts underlying the dreamfulaudisea .. in the north kingdom sala met xu cero (su sero) who became sala's friend and joined Arundas as engineer and producer .. later, after finishing a mass of unedited works, sala related the story of his travels to xu cero and asked that he oversee the editing and publishing of his material .. it wasnt long after that conversation that sala disappeared..that was over two years ago and since then none have seen him.. about the dreamfulaudisea the dreamfulaudisea is a trilogy of works that together form one 3 hour song comprised of 6 movements and divided into 27 tracks (each album is exactly 1 hour containing 2 movements divided into 9 tracks). the trilogy is based on the events surrounding the journey of sala along shores of ifelorum and beyond. its creation began in the climbs of the north kingdom then moved to the golden shore before settling finally into the blue mountains where it was completed.. about the pathless ways pathless ways is the second part of the dreamfulaudisea .. it was composed by sala and recorded and produced by xu-cero in and around the blue mountains .. mastering done by Steve Roach in the timeroom (sonoran desert) .. this work, being the second of three, picks up where the first leaves off .. like the first, it is essentially one song travelling in an unbroken stream through two movements that have been divided into nine tracks for your convenience .. total playing time is exactly one hour .. for best results put on a pair of headphones and listen undistracted from beginning to end .. (in a quiet environment a boombox at a moderate volume also works well) .. great for meditation and usable for yoga but may be too dynamic for massage .. human contributors include : ko sion whose voice appears

on tracks 1, 2, 3, 4, 6 and 7, along with the didgeredoo on tracks 3 and 4 and the mtn. dulcimer on tracks 5 and 6 -hanu goldberry whose subconscious poetry appears in tracks 5, 7, and 9 - and neanya whose bizzare fairy blurb appears near the end of track 6..other contributions made by a lesser nighthawk, a hermit thrush, a vireo, a golden crowned kinglet, a green heron, a lark sparrow, a meadow lark, 24 red winged blackbirds, 2 starlings, a white crested sparrow, a hummingbird, the waves on the shores of ifelorum, the nagga river, the heavenly rainsongs of the blue mountains appearing in tracks 3, 6, and 9, and the many subtle forces that make everything possible .. "this record is dedicated to vanamali whose encouragment helped bring it and the others to life .." -sala
