AtomicFTP Client provides the perfect combination of performance, security, and ease-of-use for the active internet user and webmaster. Whether you are publishing a new Web site, downloading the latest digital images, music and software, or simply transferring large files between your home and office, AtomicFTP gets the job done quickly and easily every time. FTP (File Transfer Protocol) is the most commonly used method of sending and retrieving files to and from other computers over the Internet. All you need to manage and transfer files is the use of a computer which has a direct connection to the Internet. Just enter the name (or numeric address) of the server you want to transfer your files to or from, add your personal username and password, and press connect! With a simple FTP program like AtomicFTP, you'll have a live connection with a remote computer in a flash!

AtomicFTP Benefits: Manage all of your online data like a pro Download images, music and software on demand Share your own files with friends for Free Transfer large files between home and office Upload your new website with ease and speed Upload your own cgi scripts direct to your server Make quick changes to your site content Make regular data back-ups for peace of mind Ease of use for both the novice and Pro webmaster

AtomicFTP Features: Windows XP Compatible Lightning fast file transfer Simple user interface and user navigation Add, delete and rename files Add, delete and rename entire folders Upload multiple files and folders at once Realtime upload/download Status Reporting Reconnect broken transfers without losing data Optional secure passive mode supports transfer of files from behind a firewall
