If You Think That You Need To Be A Graphic Designer To Produce Mind-Blowing Graphics, you are In For A BIG Shock OK, so what tricks can the Wizard perform? Here is a few of them.. Create Stunning, Unique Badges These are very Web 2.0! There is two separate badge creators available, each producing different effects. Basically, you select the shape of badge you want, add the text and a whole load of text effects, change the colors, add peel-away effects and so on. You're completely in control of the design - and it's all done by filling in boxes, selecting options, using color pickers and the like. Dead easy. Dead effective! I've done just a few different ones to show you what's possible. Add Unusual Graphics Effects For Maximum Impact There is loads of tools to change your existing images. Just upload an image and play around with the different effects. Here is just a few things you can easily do: Add neatly rounded corners to square images. Sounds easy, but it's not unless you are a dab-hand with a powerful graphics package. Add a stunning reflection. One example is my photo at the top of the page. There is another example on the right (bottom center). Produce various distortions to give you some unusual effects I'm showing you just a few of the effects you can produce with the tools in the Graphics Wizard. Produce

Striking eBook Covers Everyone knows that any product sold online is going to sell better if there is a graphic of the product on the sales page. OK, there is plenty of graphic designers out there who can produce an eCover at a reasonable price (\$40 - \$100). But can you really afford to pay out each time you need an eCover? The eCover Generator built into the Graphics Wizard can turn out good quality eCovers in a minute. Here is what you do: Pick a template. There is 20 built in and I am showing you just four of them. Pick an image for the front cover. You can either use one of the 9 images provided and add text, or you can upload your own flat cover graphic. Pick an image for the side of the eCover. Again, use one of the built-in images or upload your own Hit a button - and out comes your eCover! It really is that easy Image Manipulator This is probably as close as you will get to an online PhotoShop! You can create a whole range of stunning effects using images which you upload.
