Poser Prop File: View the preview file to see morphs in motion. This set includes three pieces, the pipe wrench and two plungers. All have morphs applied for ease of use, more realism to renders, and better animation sequences. The poly counts are these models are higher, but as quality and realism were the goals it has paid off. I may look at at lower count models if I get requests. I've had no trouble running these in the meanwhile. For more information visit the Product Showcase at Tox3d.com
