Elastic Trader is a forex system that you have never used before. More than likely, you have not seen such a thing. It is unique and its so easy to learn and follow, that you do not have to be an experienced trader to use it. It contains 3 very effective forex trading tools that show very good results. With simple confirmation of these tools, your trade gets very strong. These do not repaint the past. What you see on your chart, is what it stays with. For those who like to scalp and trade long term, this system is a must have. It has shown to be profitable on all time frames. Another great feature about Elastic Trader, is that you can add these to your existing forex system you may have. It can be used as your leading indication or confirmation. Either way, when you start using this system, you will love it! What time frames can I use with Elastic Trader? Answer: Anytime frame. Which currency pairs can I use? Answer: You can use any currency pairs although it is suggested to stick with the main currency pairs only. I am a scalper, would this system be good for it? Answer: YES! In fact, its really good for scalping. You can do a lot of it and it will be profitable. I might need help setting up, can you help me? Answer: YES! We would be more than willing to help you get it installed. Although it is extremely easy and only requires 1 click to have it all installed on all MT4 platforms on your PC, we will help you. What Will You Receive After Purchase ? 1. Elastic Trade Auto Installer (EXE File) 2. Elastic Trade User Manual (PDF)
