We see different colors every day, and we all have a favorite color. But what makes objects different colors? In this title, students will have the opportunity to conduct experiments that help them investigate what color is, as well as why things in our world are different colors. Using everyday items that kids can easily find around their homes, young students will turn into scientists as they carry out step-by-step experiments to answer intriguing questions. Along the way, children will pick up important science skills as they investigate what color is, record their observations, and draw conclusions. Color includes seven experiments with detailed, age-appropriate instructions, great facts and background information, a "Conclusions" section to pull all the concepts in the book together, and a glossary of science words. Colorful, dynamic designs and images truly put the FUN into FUN-damental Experiments.
