Funkadelic Industrial Metal Rap 23 MP3 Songs HIP HOP/RAP: Alternative Hip Hop, METAL: Rapcore

Details: I grew up in the canjo area and started making hip hop/rap a while ago. Now I produce/engineer for some friends and do my own music too. I work right at home and never stepped foot in an actual studio(besides my own). I've made a number of CD's and this is my latest. I am currently working on remixing my old songs for a more proffesional sound and if this sells I will list my old ones soon. My previous recordings were all mostly in rap format but I've decided to expand my horizons, play some instruments and try to come up with a new fresh sound away from the main stream. The result is turned out to be a sound ranging from rap to industrial metal and alternative music. My influences are Snoop Dogg, Dr. Dre, Tupac, NIN, Marilyn Manson, Orgy and many more. In the making of this whole CD I never stepped foot in a studio or had any assistance in the production. It is completly underground and is a sound you that can't be duplicated anywhere. This CD is not meant to do anything but express my self and has a deep inner meaning. I'd like anyone who listens to it to send me an email on thier opinion even if they don't buy it because I'd really like to know what people think of it whether it sucks or sounds good.
