A deep space soundworld from the south seas. 6 MP3 Songs ELECTRONIC: Ambient, WORLD: Island
Details: Colorado-based, electronic artist Kelly David debuts this CD, setting you on a course of an ambient-electro-tribal adventure. Drawing imagery from uncharted waters and travels between desolate islands in the South Pacific, the CD takes the shape of a soundtrack journey. Kelly's fascination with pure sound design combined with natural sound sources, mid tempo grooves along with deep textures, lead straight to the heart of musical darkness and light in an inviting sort of way. A strong debut by an artist who has been working quietly towards this release for several years. Mixed at the Timeroom by Steve Roach.
