Original American southern roots music on lapsteel, resonator slide, and acoustic fingerstyle picking, with clever lyrics and hypnotic rhythms that weave a musical spell. 16 MP3 Songs FOLK: Folk Blues, BLUES: Acoustic Blues Details: BLUESNEWS magazine (Germany) CD Tip of the Month October- December 2005 issue Review of "The Sun Will Shine" English translation thnx Jan! These two have survived for some time now through their troubadour lifestyle and the blues. Lance Donna are constantly on the road throughout this world with little equipment, which they use very effectively during live shows. Their next stop is always a stage, which for the duration of a show is the center of their universe. During these moments the sun often seems to shine, even in the rain. Recently, audiences experienced this phenomena at the annual Rudolstadt Music Festival where Lance and Donna were crowd favorites. They had a festival hit with their tune "The Sun Will Shine," which can be heard on their latest CD, released in June. An album that was recorded in only one day at a Cologne studio. Once again, almost all songs are originals. 15 of the 16 songs on the album were written by the duo, leaving other bands the unenviable task of covering. While decent covers may be better than lifeless originals for some performers, Lance and Donna create songs that sound and feel authentic. The nuances of the music really come across during live performances. Lance is a well versed guitarist, both in the acoustic and electric styles. And if one believes the story in the well made CD booklet, which contains many pictures, then one comes to find out the birth of Lance's musical career. When Lance was a baby, his mother laid an ukulele in his cradle! The music on the hour-long CD is rounded out by the percussive art of Donna Howley who plays rainstick and sings backup. These two interesting musicians manifest traditional blues music and bring it across in a unique way. [tm] click link for original article in Deutsch. blues-news.de/aktuell/cd_tipp.html
