Powerpop and melodic rock 11 MP3 Songs POP: Power Pop, ROCK: Modern Rock Details: Formed in 2001, refugees from several pop/rock bands in and around the Washington DC area, the three members of Onestop forged a musical union built on the firm foundation of melodic pop/rock. Onestop's influences swing from every branch of the pop family tree; from the Beatles, Rasberries, and Stones to Weezer, Bare Naked Ladies and Fountains of Wayne. And there might even be some Back Street Boys in a few of those tunes as well! Clean production, layered harmonies, and two lead singers with distinct vocal styles make Onestop a band you can listen to over and over without getting bored. Onestop's freshman CD, Pop Shop, is dedicated to the band's battle cry of "NO B SIDES!", and once you listen, you too will be a believer.
