It was a rainy morning in 1993, when she slid down her muddy wet staircase to go to student teaching and take her

children to school. When she landed on the steps she realized, she had hurt her right knee. After two surgeries and many physical therapy treatments, she was told that she was retrogressing in January of 1997. In the same month, God touched Ruth with divine healing after she followed the advice of James 5:14 and 15. The elders and some prayer warriors of her church family prayed over her and the Lord restored her to health. The Lord healed her knee problem and her other health problems of hypoglycemia and arthritis are completely gone. She would love to come and share this with you and your church family.
