Experimental electronic: alien, quirky, humorous, pseudo ethnic lo-fi. 20 MP3 Songs ELECTRONIC: Experimental, ELECTRONIC: Trip Hop Details: About 6 years ago I started experimenting with a small sampler. I have always enjoyed making weird sound effects with my voice. When I played my strange sounds on my sampling keyboard I was excited by the results. I was creating very alien and mechanical sounding instrumentals. I now have about 80 instrumentals on tape. My first CD was released in December of 2001. My music is at times pseudo ethnic, alien, strangely humorous, frightening and quirky. It's difficult to categorize but ultimately it may be best suited as film music.
