"Save \$100's On Banner Design Fees and Create Amazing Banners Yourself Any Time You Want, In Minutes!" Dear Friend, need website banners for your site? Looking for a way to save money on design fees? Need more promo materials (banners in all sizes) to give to your affiliates? What if you could simply design these banners yourself, in minutes, any time you needed to? Well look no further, because I have the perfect solution right here for you... What I have for you here is a "do-it-yourself" banner "maker" unlike any other. The problem with most other banner templates and "generators" out there is that, to put it simply, they just don't create the results you're looking for. You know what I mean... You buy a banner pack or a software, try to use it, it ends up being too complicated and after hours of wasted time you end up with an amateurish design. So you end up hiring a designer, and in the end you've wasted money and time. Or worse yet, you decide to keep that amateurish banner and waste even more time and money with it. And after this whole process, when ever you need banners in the future, you just decide to skip this whole step all-together. And you end up missing an important piece of your overall marketing campaign that can bring in new leads, sales, and more business. Having professional banners in your marketing arsenal is a great way to squeeze more out of your business. But it does cost extra money, or

takes too much time to try and do yourself. Well, what I have for you here is something different. Something that creates GREAT looking banners, in minutes. And something that you can do yourself and save hundreds of dollars on design fees. AND also something you can start using right away, without a huge learning curve, or pretty much with no design experience at all. Here are is exactly what you get... First, you get the "master" templates in all of the most popual banner sizes. You get 8 of these "master" templates, in 8 sizes (in pixels): 120 x 600, 250 x 250, 200 x 200, 468 x 60, 120 x 240, 180 x1 50, 125 x 125, 234 x 60. "Copy and Paste Elements". These are basically pre-formatted "elements" for the inside of your banner design. They're things like text, bullets, and buttons. And all of these come pre-formatted with cool effects and styles applied to them. And you can simply copy and paste these into your own designs and the master templates. To make it easier for you to customize the "copy and paste elements" and the master templates, I'm also including over 180 layer styles that you can apply to your graphics with just a few clicks. You also get step-by-step video instructions on how to use everything, so you'll be up and running right away. In one of the videos I re-create one of the sample banners that you see on this site in real time. You get over 30 minutes of these video instructions. Lets recap about what you will receive... The Easy Banner Maker Pro Package A step-by-step video instruction PDF install instructions for the ASL styles Original sales page in english and german Privacy Policy-, Earnings Disclaimer-, Terms and Conditions Page. Images and a Master Resale Rights License. We are authorised Reseller and in the possession of the necessary licences for this product. Therefore we do not offend against the copyright!
