BIO/ENGLISH VERSION Basi and DjAgustin were raised in a small border town in mexico, they used to live in the same street also (without knowing it), then destiny pulled them apart in different directions.. One got his affection for electric guitars, and the other for vinyls and turntables, several years later, they met up in Monterrey city (Mexico), and in june of 2000, and after long sessions of drinking booze and getting high..,they decided to form a loop programing, electronic drum ranch based project called "CHICOTE", They started it just for fun, never thinking about getting signed or anything serious, then months later they decided to get a gig at a local bar just to see the reaction of people to their music...and people loved it, they started to be a cult band in the Monterrey underground scene, so they wrote more and more songs, about 50, and recorded a demo, which was given to friends., Word spread among musicians, producers and promoters, about these two "locos" who were making different sounds when everybody was trying to be the next sum 41, or the mighty mighty bosstones in Monterrey... then after reviewing several contracts from major and indie record labels, they decided to make their own, along with their friend, Ferruco, started a little indie label called PICOSO RECORDS, and recorded their first album in February 05, their debut album "HISTORIAS DEL RANCHO" is out now in local stores.CHICOTE has been touring Mexico now for a while...
