A meditative collection of solo wood flute originals, by a Mashpee Wampanoag. 10 MP3 Songs WORLD: Native American, NEW AGE: Meditation Details: "What a lovely recording!! Just sings to my soul..." "I wanted to write to thank you for the beautiful CD! I was able to play the whole CD without interruption. I opened all the windows and let the music float outside with me as I walked in the garden, picked flowers and vegetables, and just sat on the grass - soaking in the music. It filled me with a sense of peace and well-being. Thank you for your kindness. I will share your beautiful music." "Can this be a new Carlos Nakai release? That is what I would have thought had the hauntingly plaintive yet uplifting flute melodies caught my attention without a proper introduction courtesy of a personal communication to Spirit of Change and information packet from artist/composer/producer Ej Mills Brennan. The Nakai comparison is complimentary but except for the fact that both flutists have fine-tuned a talent endowed by Creator, the uniqueness and feminine sensitivity of Ej's second collection begins to distinguish her personal artistry with unmistakable clarity. After enjoying 45 minutes of spiritually refreshing music, one is awed by the flutist's ability to commune with the listener and the Powers simultaneously in an enlightening session of meditation and prayer through the sacrament of sound."
