This is a techno CD featuring several influences, i.e. hard trance, psy, electro and progressive. There's no limit to my creations (neither fashion nor trend). My mind is fully opened to all influences that may affect the sound. Both aggressive or melodic 12 MP3 Songs ELECTRONIC: Techno, ELECTRONIC: Trance

Details: My name is Fabrizio a.k.a. FABRIS. I was born in Bergamo, a town in the north of Italy, quite close to Milan. My passion for music began when, as a kid, I touched the mixer for the very first time and grew over the years. I started working in small clubs in my home town and the desire of creating techno music sprouted just at that time. In my tracks, I tend not to follow any trend or vogue; I just follow my instinct, my creativity, mixing different styles of music and sounds. I span from techno to psy-trance, from electronic to industrial...well...whatever the outcome is, it pursues the sole purpose of satisfying my ears... When it comes to my music, I have no boundaries; I just get in the zone and let the sound come out free.

Bye bye Fabris
