This album burn with anti-superstar idea, the music is the center, this album is a mix of cultures, ideas, philosophies and a lot of drugsthe rest is not important. 20 MP3 Songs ELECTRONIC: Breakbeat/Breaks, ELECTRONIC: Experimental Details: Its not easy to say exactly who Fernando is.. In fact, were not even sure thats his real name. Everything we know about him is confusing, because none of us know who he is or where he is for that matter. We run into him at teknivalsor an e-mail comes in thats about it! He doesnt talk a lot about himself and when he does you never know if hes taking the p**s or not. One thing we know for sure is that hes a man from the East. From some half-bit ex- Soviet town, maybe in Cecenia or further South. He says the name of the place is Opachichi. What else do we know? Hes about 30, got a degree in physics (or maybe maths). Hes an electro-head, a programmer, and he collects analog synths. He lives in an old Russian army truck thats pretty damned cool inside. 1 dude live set and a satellite internet connection. It seems that hes got some hangout in the South of Spain somewhere too. Some old storeroom or something by the sea, overlooking Morocco. He gets by flogging or swapping old Russian army stuff for western European electronic gear which he then touts back in Russia. In any case, last summer at Cektek, one of our guys talks with him about the record label projects... A few months later and all this gear started arriving, tracks and sketches for the CD cover and stuff. We thought the music was cool so we decided to produce it. And thats about all we know. If you wanna catch a live performance you have to hit lucky at the right party. Well do our best to try and let you know what the dudes up to. And if you wanna get in touch heres his e-mail: fernandopoo@joprec.org If you wanna find out any more than that you gotta listen to the music. Cool minds dont die, their ideas and actions hang around and their energy will still be in the air long after we are gone. F. Poo
