International pop/dance with a relaxing groove of bass drums 13 MP3 Songs WORLD: World Fusion, POP: with Electronic Production Details: The album "Life Today. . .Tomorrow" is an attempt to combine African, Pop/Dance, Jazz, Caribbean, and Asian music styles in such a way as to give the listener the feeling that they are in a world without boundaries. The direction of this fourth CD was to create a sound that was strongly rhythmic but still contained different aspects of world culture. We used traditional instruments from Africa, Asia, Borneo to try and get a truly international sound. The vocals have a Jamaican origin combined with a solid foundation of bass and drums, highlighted with keyboard melodies samples and smooth guitar harmonies to create a perfect mix. This CD has gained mass appeal with fans from many backgrounds, from South Africa to Japan, London to Russia. Young old enjoy this fusion of styles and rhythms. (That is why we call it World Beat!) Please listen enjoy.
