

Quick Video Maker

[DOWNLOAD HERE](#)

We all know that video marketing is a huge thing. Most of us probably have a ton of videos on Youtube and other video sharing sites and all with links back to our various web sites generating us traffic daily. But making those videos takes too damn long. The bottom line is that in many cases a quick slide show

with a web address, phone number, etc is enough to get a view and enough to grab a viewers interest and make them click on your link. Making videos like this with Movie Maker or other traditional video software takes time. And time is money. There are a number of services that can make videos from slides for you in super-quick time but most of them are subscription based and you have to pay \$10-\$30 a month, and some cap how many videos per month you can make. Screw that. Of course you can outsource the job and pay someone \$5 - \$30 per video. No Thanks. There is software out there that will make them for you but its either pricey or not built with marketers in mind. Stuff that for a game of soldiers. This isn't the first piece of software that can turn pictures into slick videos with background music but it is one of the quickest and easiest to use and it produces great results.
