The Secret Hands Free Method To Creating Feature Rich, Robust & Easy Selling Software With No Coding, No Programming, No Frustration! The Hands Free Software Developer Create & Profit From Feature Rich, Highly Interactive Software Applications Without Knowing One Line of Programming Code! Have You Always Wanted To Break Into The Booming Software Market? Have you always dreamed of selling software on the Internet for huge profits but lack the programming skill to create them? What if I told you that you can cash in on software creation and you dont even need to be a programmer? In fact, you dont need to know how to write a single line of code! Through a few little know tools and resources you can create software applications that make people salivate and whip out their credit cards! The Hands Free Software Developer Hands Free Software Creation... Dear Friend, If you have ever sat back and watched high school kids and college kids make millions on the Internet creating and selling software because they know how to program, this letter is going to shock you. Until now, you probably thought theres no way I could ever make it in the software market because I dont know how to write programming code and that was a valid thought. But the good news is that you dont have to! You dont even need to

know a single line of code and you can still create and release extremely successful and feature rich software! I know, I know, this all probably sounds a little bit over the top but stick with me for 4 or 5 minutes and check out the information in this short letter. You'll see undeniable proof that what I'm talking about is not only believable and doable for anyone but also extremely profitable! You also need to know that... **The Software Market Is Booming & There Are Millions Of Hungry Buyers All Over The Net!** The opportunity is wide open for you to cash in on the booming software market. It's a fact, little guys and gals just like me and you are making a killing turning our ideas into profitable software solutions and selling them on the Internet regardless of if you are working from an office, or just from your home! Software is one of the biggest selling products in the entire world, and it has one of the highest possible margins. Create it once and sell it over and over. Regardless of if you sell 10 copies or 10,000 copies, you only have to pay your creation costs once! Why is software so hot? It automates tedious tasks, helps people do things that were once hard to do with ease and saves people loads of time. Basically software makes life easier for people and saves them loads of time, and in a world that moves so fast, time and solutions to people problems are very important. If you can offer something that is going to save people time, money or frustration people will gladly pay you handsomely for your solution. In the last 10 years software sales have shot up and aren't going to stop anytime soon. Software is here to stay forever and you need to get on the band wagon! I know, I know...You're probably thinking I can't design or program software! And with what you know right now you may be right. But after you read **The Software Outsourcers Bible** that will all change.. I Guarantee It! Have All Your Ideas Come To Life By Handing Them To An Outsourcer Who Will Do All The Hard Work For You! You don't have to know how to write a single line of code or know the first thing about programming and you can have beautiful software designed. There are tens of thousands of programmers all over the world that are extremely hungry for a chance to work so it's very easy to find someone to write your project! This is great news for you. Just by following a few simple secrets on working with an outsourcer, you can just sit back and relax as your idea turns into a full fledged software product that thousands of people will want to buy! Would you be interested in having the next hot software on the Internet without writing a single line of programming code or without having to deal with any of the technical hassles? I bet you would! It's not hard to have awesome software created for you. The best part of the whole outsourcing way of doing things is no one will EVER know that you or your software marketing team didn't personally write the software code! That's whole point of hiring an

outsourcer! You pay them for their work and it then becomes your property which means you are 100% the author of the software! How cool is that? The next logical thought you may have is This must be very expensive to hire a person to do all the programming but the truth is... You Could Never Imagine How Cheap It Can Be To Have Someone Else Write Your Software For You! When you think of working with a programmer or software designer you probably think that it costs thousands of dollars to have your ideas turned into reality. While this is true in most cases, especially in the United States, there are extremely cheap programmers and software designers all over the world that will gladly do your job for what you can afford. You just need to know the secret places they hang out. (Most people don't know these places, but you will soon) And no, this isn't some underhanded way of tricking someone into doing your work dirt cheap and then leaving them in the dust. The system I'm going to show you will teach you how to be completely honest about your intentions and the software you're having written and still get a huge bargain. Here's a fact you need to realize that may put the whole software opportunity into perspective for you: There are 10 times more programmers than there are programming jobs. That means that only 1 in 10 programmers are working! That also means that they are scouring the Internet for work and willing to work at super affordable rates because there is so much competition for the available projects. This is your opportunity to cash in. So How Can I Learn The Secrets To Hands Free Software Development? You Don't Need A Degree In Computer Science To Have Your Own Software Designed! The Hands Free Software Developer is a revealing, new e-Book that will clear the fog surrounding how to have your software created by outsourcers. It will show you how to do it quickly, easily and cheaply with very little time invested on your part. Here's just some of what's covered... * Where To Look For Super Cheap, Super Qualified Software Programmers * Get Your Software Created Without EVER Looking At Programming Code! * How To Select The Right Outsourcer For Your Projects Success! * Easy Design Secrets That Make Your Software Come Alive Fast! You're getting insider information from the inner world of the industry that will show you what the big software companies don't want you to know! This information is highly guarded and confidential! You'll be getting an easy to follow plan that will make you a pro software developer in no time without any programming whatsoever! Can you imagine making enough money to become financially independent? Do you want to be able to call yourself a successful online business owner? This Sounds Great, But Can Someone Like Me REALLY Do This With No Technical Knowledge And Without A Big Bank Roll? There is no doubt that you can do this! It's true, most

people are skeptical when they hear that they can start their own software empire on a shoestring but I'm here to tell you it's true. You can take advantage of the underworked, highly competitive pool of programmers that are all over the world. This isn't common knowledge. VERY few people know about this pool of people just dying to work at cheap rates and the few that do aren't talking about it. If you had the opportunity to have dozens of people ready to design your software and competing with each other offering you a lower price would you want everyone knowing about it? You probably wouldn't. But I'm breaking that barrier and unleashing all of the secrets for you. You will absolutely be able to have your ideas turned into profitable software with no programming and without breaking the bank, I guarantee it!

These Tightly Guarded Strategies Have Been Behind Lock & Key For Years But You're Going To Get The Key To The Kingdom! I want to emphasize a few things for you. 1) It's easy to find a person to turn your idea into a real, working piece of software that people will pay for. I will show you where to find them and how to deal with them for the smoothest experience you could ever imagine with NO PROGRAMMING. 2) It isn't expensive. You're going to learn how you can get these outsourcers to do your bidding for you. You do not have to feel bad offering them a cheap price. They will bid on your project offering you dirt cheap rates and they'll love you for it, if you select them to work on your project! (I had a great piece of software written for just \$60 in one instance and I own all the rights to it and sell it for \$500 a copy, and it sells very well at that!) 3) This doesn't take loads of your time to do. You will be able to monitor the progress of your project in just a couple of minutes a day, I will walk you through everything step by step! Here's just some of what you're going to learn...

- * Secret Hide Outs Where The Best & Most Affordable Programmers Hang Out!
- * Efficiency Systems For Making Sure Your Work Gets Done Just How You Want It!
- * Tricks That Weed Out Bad Programmers & Bring To Light The Great Ones!
- * How To Make Sure Your Software Runs Smoothly And Is Tested Properly!
- * The Top Secret Planning Method That Shows The Programmer Exactly What You Want!
- * How To Create Million Dollar Software Ideas & Blueprint Them Quickly!
