The word "Emptiness" has many different meanings: It is space between Planets and Stars or vacuum in Physics. It is psychological condition of somebody who , by some reason is unable to feel anything emotionally and have no purpose in life and see no value in all things and events of this world. It is also "Sunyata" on Sanskrit which signifies that everything one encounters in his life is empty of soul and permanence and have no self nature. All things in the universe arise from existence. But existence arises from emptiness. Knowing not to know is better. Not knowing to know is a defect.
