SoulVibe's debut album merges ambient groove, techno acid jazz with a touch of hip-hop, pop and new age. Sometimes mellow, sometimes aggressive and intense, always unique. 12 MP3 Songs

**ELECTRONIC: Ambient, ELECTRONIC: Trip Hop** Details: SoulVibe's sound blends the chaos and colors of electronic music with the soul of acoustic instruments. Some call it funky hip-hop infused ambient groove acid jazz laced with blues and new age techno. Mixing melodic piano and synth lines with break beats and hand drums, Josh Colton, the sole member of the band, weaves a tapestry of sounds laced with analog waveforms as well acoustic instruments including harmonica, recorder, and trumpet. The result is unlike anything you've heard, but instantly definable once you have. Pulling from a wide range of influences, SoulVibe's music is what would happen if Pink Floyd and Peter Gabriel were morphed together and jamed with Moby and a symphony orchestra. Sometimes mellow, sometimes aggressive and intense, always unique, SoulVibe takes electronic music to new plateaus. Check out more information on SoulVibe at [soulvibe.com](http://soulvibe.com).
