You may attract higher quality link partners to your site. People's perception is that your site has lasting power. People will want their sites to be like yours. People may hold your site in higher regard than a competitors. Even now, as you read this page many people browsing your site(s) will be looking for high ranking web sites to exchange links with or deciding whether to make a purchase from you based on your Google Page Rank. Features At A Glance: Quickly check up to 25 domains for the page rank with this handy little program. It remembers the PR of the last check so you can get a before and after overview. You can copy and paste domains and export to Comma Separated (csv) document. What Is Page Rank? Google Page Rank (or PR) is basically an indication of the number of websites that link to a particular site and particularly an indication of the quality of those links. PR ranges from 0 to 10 (with 10 being the 'best' and 0 being the 'worst'). The majority of small business sites generally rate between 0 and 5. Handy Tip: Each link to your web site from another

registers like a vote of confidence Their link implies that the other site considers your site to have value. However, all links are not equal. You must get links from similar themed sites to yours - Anything else could possibly decrease your page rank. Tags: resale rights
