A popular duophonic/monophonic classic from Korg. It's got 2 analog oscillators that can be used for one fat monophonic sound or 2 VCO's per voice for a fat duophonic sound. Flexible design with 2 VCF filters and even a ring modulator. The MaxiKorg is a great source of early Korg sound that rivals competitors like the OSCar and Roland SH-synths. No MIDI no memory but good bass and screeching leads. It has no CV input either though it can be modified to accept external control from the less standard Hz/V protocol also used by Yamaha. Most people usually understand it best as two separate Minikorgs inside one keyboard with all the controls to both. Most people will stack both voices as the triggering can be tricky as duophonic. It has the very effective ability to delay one voice before it triggers when played mono. It has been used by Kitaro Vangelis and Soft Cell. CONTAINS 330 WAV SAMPLES.
