

Managing Fragile Regions

[DOWNLOAD HERE](#)

This book brings together leading scholars from several disciplines to address post-disaster reconstruction, management of natural resources, and regional development in earthquake-hit areas using the lessons from the Wenchuan earthquake of 12 May 2008. The key topics dealt with in this volume include damage assessment after earthquakes, lessons of post-earthquake recovery, rehabilitation and reconstruction, and examples of crisis decision-making. Global implications for public policy, land use options, urban planning, and design are also discussed. The contributors tackle existing problems regarding issues relating to the management of natural resources in a disaster area, including hydropower, forests, and biodiversity, with applications from the highest magnitude earthquake in recent Chinese history. EAN/ISBN : 9781441964366 Publisher(s): Springer, Berlin, Springer Science & Business Media Discussed keywords: Erdbeben, Naturkatastrophen Format: ePub/PDF Author(s): Guo, Rongxing - Freeman, Carla
