You'll be amazed to see someone else feel good at the same time you do, all of course, while listening to My Grass Is Blue! These tunes were written about real places in the mountains of North Carolina, where I grew up. My parents would take a Sunday drive into a different part of the mountains, a trip I always looked forward to. Some of these tunes are of places my Dad and I would go trout fishing and the tales that accompany any fishing trip. It is with these thoughts in mind that I dedicate this first in a series of Doctor Johnny Feelgood compilations to my parents, John Mary, ( Thanks for the music lessons! ), my wife Mary, my son Tyler, my daughters Makenzy Reagan, for all their love, support, encouragement, and understanding, I am truly a blessed man. Thank you God, from whom all blessings flow.
