Dark, textured, and evolving post-industrial soundscapes; deeply philosophical and relentlessly political. Music for ruined cities. 11 MP3 Songs ELECTRONIC: Industrial, ELECTRONIC: Experimental Details: This has been a shameful era in human history. We have despoiled our planet, let governments commit mass murder in our name, allowed our science and technology to further the needs of a few rather than to improve life for humanity as a whole. We have failed as an intelligent species. This CD is an extrapolation based on current trends. I hope that by glimpsing this future we can change it. Maybe you have some ideas... and maybe this CD will stir them up. * * * * *
