R&B soul funk 11 MP3 Songs URBAN/R&B: Funk, URBAN/R&B: Rhythm Blues Details: Introducing the 3rd all original music cd, Funksway Sage has spent the last 18 months working on this new cd concept bringing a blend of music, harmony, syncopation and soul is Funksway. It is evident that Sage has had many influences that reflect on these tracks from solid rhythm section horn driven east bay grease funk, some soulful James Brown licks, and even a little Stevie Wonder energy. During the music composition and recording, the songs were beginning to really take shape with the Sage bandmembers performances, and these tracks also drew attention. This brought a few other awesome friends of Strokeland musicians to add their stylings to this project. Making guest musician appearances on some of the tracks are; Tom Politzer (sax Tower of Power), Adolfo Acosta (trumpet Tower of Power), Bruce Conte (guitar Tower of Power), Mic Gillette (trumpet trombone formerly with Tower of Power) and another great contributor was Andy Winer (trumpet flugelhorn), from the American Idol band. Knock You Out brings a feeling the soulful rhythmic sparing between the band and the audience. Ants has an infectious beat that when you hear it, you cant help but get up and dance. Funksway, the title track blending an incredible funky rhythm section with blasting horns, blended with our soulful philosophy vocals. Funksway aligns all these musical elements to bring the maximum funk to life.
