Powerful dark techno. 9 MP3 Songs ELECTRONIC: Dance, ELECTRONIC: Ambient Details: Inspired by Paul van Dyk and Mozart, Gershwin and Moby, Depeche Mode and Tchaikovsky UltraMax combines technological innovations of the 21st century - acid sounds of analog synthesizers, deep bass and pumping energy of beat - with purity of classical instruments - piano, harp, violins and cellos - all with the goal of pushing the frontier of dance music further, towards the ultimate unity of classical and techno. Born in the heartland of Russia in a millennia-old city positioned on the cross-roads of Nordic and Slavic civilizations UltraMax follows in the footsteps of his outstanding compatriots: composers, writers, poets, and cosmonauts. Dedicating 7 years of his life to studying classical piano performance and another 7 to an advanced degree in computer science UltraMax is pursuing the quest of knowledge. His interests span from Sumerian history and cuneiform tablets to present day politics, from ancient astronomy to modern astrophysics, from computer music to advanced topics in gravity in superconductivity.
