SWINE INFLUENZA- Can it be cured? So far many medical research centres have worked upon the Swine Influenza, whether it can be cured or not. So far all the researches have revealed that the disease is curable with the help of prompt treatment. Certain drugs have been tested to check their efficacy regarding the treatment. The centre for Disease Control and Prevention (CDC) stated that this flu can be treated very early, if caught, with two of the antiviral medications, Tamiflu (Oseltamivir) and Relenza (Zanamivir). These must be taken within 48 hours after the first symptom recognised for better results.
