

Husqvarna Viking 6690 Sewing Machine Service Manual

Directions for use

These service instructions are intended to be used by service workshop personnel or by salesmen who carry out servicing in their own districts themselves. They assume a thorough knowledge of the handling of precision appliances and accessibility to service tools.

The manual is divided into three sections and includes all service points and checks which should be carried out during a complete overhaul of a sewing machine. The first section includes the control of the accurate functioning of integral details. The second section deals with the various settings which must be maintained to ensure that the machine functions in a satisfactory way.

The third section deals with dismantling, mounting and setting the electronic units included in the machine.

The diagrams only give an indication as to where the detail or mechanism mentioned is located in the machine. For more detailed information regarding the construction, etc., refer to the diagrams in the spare parts list. The codings of the details refer to these diagrams-as an example, detail 5/37 can be seen in the spare parts list on page 5, pos. 37.

Contents	Page
Visual control of details	3-9
Setting instructions	10-29
Electronic units	30-44
