These intuitive but neatly-woven tracks will introduce you to a music which is heard from far and never stops like a great waterfall. From Japan. 6 MP3 Songs JAZZ: Bossa Nova, POP: with Electronic Production Details: it was fall 1999 when my music started to flow in me. i seriously wondered if i had gone crazy but i couldn't just let go--the music was quite unique, somewhat nostalgic as if my previous lives were trying to use me as a medium to express their music from the ancient times or something. the first thing was to figure out how to express all those beautiful sounds and melodies. it took me a few years to become comfortable with the instruments, mainly my dearest guitar tapioca and my vocal. i was thrilled to learn how to record myself and started working on it in my room. in summer 2002, i was simply obsessed! i did work on recording all weekend long and every weekend. and finally another few years later, i put together these 6 songs as my first album to share with you. you may be able to sense many different emotions and feelings of mine in these recordings, and i am happy to let them stay as they were ;) thank you for listening***
