Details: Songscapes by Sam Pearce offers you, the listener, a golden opportunity to feel just how powerful, romantic, relaxing, and comforting instrumental piano and orchestral arrangements can be. These songs provide you with a backdrop to, well, anywhere your mind would like to take you. Whether it be the site of a beautiful bride strolling down the aisle on her wedding day, a beautiful summer sunset on the horizon, the first sign of autumn in New Hampshire, or a misty fog at the feet of a thick forest in the winter. That is how powerful this music is. It evokes vivid imagery, and its uplifting and soothing at the same time. And, if you really imagine, you can picture yourself in the very scenes that your mind allows the music to produce. You can be that bride living out her dream as a little girl, or that chivalrous knight in shining armor sweeping her off her feet, and would gladly slay any dragon for her. But if you need proof of how inspiring this music is, simply listen and experience it for yourself. Songscapes is a collection of 11 songs that offer plenty of imagery, passion, and emotion. I promise you, disappointment will not be a part of this cd! - Kevin Childress
