Christian latin rock with a Carribean flavor that is packed with dynamite and really moves and grooves. 10 MP3 Songs ROCK: Roots Rock, LATIN: General Details: I am a Cuban born male with a background of Spanish music and American music like Santana, Van Halen Boston, Dave Matthews Bands and such like. Then after a bonafide miraculous encounter with Almighty God, I began chasing after God and learning His ways and using the talent of music and writing songs that He gave me to worship Him. He led me to use these talents that He gave me to get the attention of His young masterpieces that are searching for some kind of fulfillment from this life. Revolving around a testimony of deliverance, and now after attaining true love, joy and peace, these songs go deep into the human spirit of anyone hungry for more than this brutal life offers! These songs are songs of hope! They tell the name of who our living God and Savior is and what this temporary life is all about. I play guitar and sing primarily although I also have delved into playing bass guitar, drums and piano. Don't worry I hired the guys on the recording and thanks to my church body for the use of the choir and for all of their help! The music is inspired by God and is somewhat different from what I'm hearing out here now. Many traditional churches may not like what I'm doing but the traditional churches at the time of God in flesh walking on the Earth didn't like what He was doing either. I thank Jesus for all He is doing and for all He has done including the hope that is within me as well as the joy and peace that defies description. I wish I could pour it on everyone because everyone that experiences it becomes addicted to God as well! You can feel Him in my music and songs which lets me know that He is pleased...
