Turbo Transactions Manager Paypal Compatible The Easiest Way To Manage Your Paypal Transactions! Here's the secret to managing your PayPal transactions with the ease, power and flexibility that even a CPA would love... But you DON'T have to be a CPA to use it! Now you can solve the #1 problem that PayPal merchants face every day... Sure, PayPal is a great way to send and receive payments and it's probably the easiest system to implement if you're running an e-commerce site, but all of that ease of use comes with a price to pay... You see, in an effort to keep PayPal as easy to use as possible for the greatest number of people, the company does not provide powerful transaction management tools. In fact, all you can do is view your transactions online or download them to a CSV file. BUT... * What happens if you want to sort, file, query, print or send your transactions to your accounting system? * What happens if you need to generate detailed transaction reports to send to JV partners or affiliates? * What happens if your accountant wants you to code transactions by product type? * What happens if you want to track sales by promotion code? Turbo Transactions Manager is the fastest and easiest way to download, import, sort, file and report on your PayPal transactions. Simply install the PHP/MySQL script on any PHP-enabled Linux, Unix server and you get instant control over your PayPal transactions via any Internet-connected computer in the world! It really is that easy. Here's What Turbo Transactions Manager Does: Imports your PayPal transaction records using files generated by the PayPal Download History Manager. PayPal lets you choose the date range and transaction types. This means you can download as frequently as you want, even every day if you need to. And don't worry about accidentally importing duplicate information -- Turbo Transactions Manager is too smart to let you do that. Lists all transactions or you can filter or search by any of these categories: Transaction Type Transaction Date Transaction Status Customer Name Payer Email Receiver Email Or create your own custom categories and Turbo Transactions Manager will remember and use them! You can even choose multiple sort and filter options for several of the categories. You control the flexibility; you control the power with point-and-click ease. Field Picker lets you choose just the data fields that you want to see onscreen and in your reports. The fully-flexible interface lets you add, delete and restore any of the available transaction fields. Print Reports

using any available filter condition and the Field Picker settings. Turbo Transactions Manager outputs clean, well-formatted reports to any installed printer on your PC or network. You can even print to PDF file if you have a PDF driver installed. Export Records to industry standard CSV files using any available filter condition and the Field Picker settings. Choose "With headings" or "Without Headings" depending upon your software requirements. The exported file can be imported into MS Excel and many other programs including popular accounting software. Finally you can manage your PayPal revenue in a professional manner. Here's How Turbo Transactions Manager Works: Turbo Transactions Manager is written in PHP which is one of the most common scripting languages in the world. 99.9 of the Internet servers in the world run PHP. The chances are yours does too. You simply upload the files to your server, enter some simple configuration information, and you're up and running. Total Installation Time is Under 5 Minutes and the Included Easy-To-Follow "Plain English" Manual Guides You Through the Simple Steps. Using Turbo Transactions Manager is simple. Here's all you do: * Log into your PayPal account, run the built-in export utility and download the CSV file to your local computer. * Point your browser to the Turbo Transactions Manager script on your Internet server and click the Import button. * Choose the CSV file that you just downloaded from PayPal, click and Turbo Transactions Manager does the rest! Your PayPal transactions are imported and available to see in seconds. It doesn't get any easier than that! Here's Why You Need Turbo Transactions Manager: The interface at PayPal provides only the most basic access to your transaction data. If you depend extensively on PayPal to receive payments for your goods and services, or you use PayPal to pay your vendors, suppliers or affiliates then you already know how hard it is to reconcile your PayPal transactions. With Turbo Transactions Manager you can easily track inbound and outbound payments, refunds, charge backs and everything else you need to manage your profit and loss. Instantly create reports for distribution to anyone including your accountant.
