Article Directory Install Instructions Server Requirements 1.PHP4 or Higher 2.MYSQL 3.htaccess enabled web Hosting Rebrand the main logo Open top.gif in the images folder and change Article Beach Logo to your own name with Paint or Photo shop. Prepare Your Database Open MySQL Using cPanel start by clicking the MySQL Databases Icon.. Once Inside STEP 1 Create an empty MySQL database on your server use any name you wish STEP 2 Create a username and password. STEP 3 Assign this user to database you created in step 1 Populate Your Database STEP 1 Go to Phpmyadmin at the bottom of your database menu above and select your database from left side menu. Then click SQL to open a SQL Box STEP 2 Open the ARTICLE.sql which is located in the same setup-instructions folder you are reading this tutorial in, into a text editor (such as notepad or editPlus) Copy and paste all of its content into the SQL box OR you may also upload this database via the upload function. STEP 3 Now your

database is fully created and ready to use with default categories and the admin login. Prepare your files

STEP 1 Open the includes/config.inc file into a text editor (such as notepad or editPlus) STEP 2 Edit the file to match the user information you created above in the "Populate Your Database" Step1

your_database your_user youruserpass You will need to edit the information in "Quotes" on line's 10,11 & 12 Prepare your files

1.Upload all files into Public_html directory on your server using an FTP software, if you do not have one try the 30 day free demo at WSFTP.com. You must keep the directory structure same as it is now in the ArticleSite folder. Once uploaded it will look like this in your FTP software. Set Chmod permissions On the empty folders backup set to 777 admin/backup set to 777 This is so your system will be able to write the backup files these folders admin/images set to 777 This so your system can save images to this file To set chmod permissions of these folders in your FTP software right click with your mouse on the folder you wish to change select "properties" at the very bottom of the box that will open. Now enter 777 in the number box or check all squares Set General Settings on Admin Panel 1. Your site should be up and running now. 2. You can login to your admin panel at yoursite.com/admin user=admin login= admin. 3. Go to you settings page after you login and set your general setting there. All pages of your sties static pages can be edited in this area, and it is all pretty self explanatory.
