

## Auction Website Script Clone Php

[DOWNLOAD HERE](#)

Fully Functional php Auction Website Script PHP WEBSITE SCRIPTS! FULL RE-SELL RIGHTS!  
RESELL FOR A PROFIT! This is a great chance for someone wishing to enter the dotcom revolution by selling readymade websites. We usually sell these scripts for a lot more, but we want to allow fellow entrepreneurs on eBay to share in our success. Similar scripts sell for 20 - 30+ EACH . But don't pay silly prices! Get them all here for a bargain price! The scripts come with Full Re-Sell Rights, so you can make a fortune by either splitting them all up and selling them separately on eBay or simply resell this Megapack. All scripts come with full installation instructions, so you could even use them yourself! Installation of this script requires adequate script installation knowledge. We offer no installation support

and this script is a digitally downloadable product and is sold as is with no warranty or tech support from us. Server Requirements: If you want to use them yourself, your web server must have support for PHP. IMPORTANT You have brought this website from a RESELLER and NOT the author of this script. Therefore, this reseller offers NO help and support for this product. Installation of this site may be more difficult for beginners as it requires setting of cron jobs. If you do not know what a cron job is and how to set one, instructions for how to set a cron in Cpanel are below or you can look for help at [smartersupport.com](http://smartersupport.com) Step One: Create a database Step Two: Edit config.php with your MySQL information. Step Three: Edit includesadminmail.inc.php with your main email. Step Four: Upload all all files to your server, keeping the directory structure in tact.. Step Five: Set permissions on the following files: chmod 777: the folder "counter" chmod 666: /counter/auction\_id.txt chmod 777: the folder "uploaded" chmod 777: the folder "banners" chmod 777: /includes/adminmail.inc.php chmod 777: /includes/categories\_select\_box.inc.php chmod 777: /includes/countries.inc.php chmod 777: /includes/currency.inc.php chmod 666: log.txt (for debugging purposes in payment system) Step Six: Create a cron job to ensure that the page cron.php gets executed periodically. This page will close auctions, notify bidders, etc. The following is a cron to run daily at 12:15 am. You can change this once your site has heavier traffic to run more often however to start with once a day is highly recommended. Using Cpanel, access cron jobs off the main page. There, click on Advanced (Unix Style), and enter your email address then enter the following information in the box's: (15) in first box, (0) in second, (\*) in third, forth and fifth, (GET yourdomain.com/cron.php /dev/null) in the text field. 15 0 \* \* \* GET yourdomain.com/cron.php /dev/null Step Seven: Visit yourwebsite.com/install.php. This will run the installer that will create the tables and populate your data, after the installer has completed you will be prompted to create your admin login information. Once complete, browse through the admin sections to edit your website. It is recommended that you delete install.php from your server after the site is installed. Please report any bugs to [smartersupport.com/helpdesk](http://smartersupport.com/helpdesk) Step Eight: If you wish to edit the logo, a gif called logo\_blank.gif is included in the images folder. Modify the logo in a program like Photoshop, or other painting program and replace logo.gif
