

Fixed Point Theory For Decomposable Sets

[DOWNLOAD HERE](#)

Introduction.- - Part 1. Functional Analysis Background. - 1. Preliminaries. - 2. Real and Vector Measures.- - Part 2. Multifunctions. - 3. Preliminary Notions. - 4. Upper and Lower Semicontinuous multifunctions. - 5. Measurable Multifunctions. - 6. Caratheodory type multifunctions. - 7. Fixed Points Property for Convex-Valued Mapping.- - Part 3. Decomposability. - 8. Decomposable Sets. - 9. Selections. - 10. Fixed Points Property. - 11. Aumann Integrals. - 12. Selections of Aumann Integrals. - 13. Fixed Points for Multivalued Contractions. - 14. Operator and Differential Inclusions. - 15. Decomposable Analysis.- Bibliography. EAN/ISBN : 9781402024993 Publisher(s): Springer Netherlands, Springer US Discussed keywords: Fixpunkt Format: ePub/PDF Author(s): Fryszkowski, Andrzej
