

# Inter-basin Water Transfer

[DOWNLOAD HERE](#)

Examination of inter-basin water transfer projects for professionals and researchers in hydrology, and environmental science, policy and regulation. Increasing demands for irrigation, domestic and industrial water have generated a massive growth world-wide in the number of large water infrastructure projects involving the transfer of water from basins considered to have surplus water to those where the demand for water has exceeded or is expected to exceed supplies. Using the experiences of projects in Australia, United States, Canada, China and India, this book examines case studies within the diverse geographical, climatic, economic, and policy regimes operating in these countries. It examines the water resources of Australia, the driest inhabited continent, and explores inter-basin water transfer projects in the United States, Canada, China and India, examining their benefits and impacts within these nations' contrasting economies and governance systems. This comprehensive and well-illustrated text will be of great interest to professionals and researchers in the fields of hydrology, water resources, and to those engaged in environmental science, policy and regulation. EAN/ISBN : 9780511267246 Publisher(s): Cambridge University Press Format: ePub/PDF Author(s): Ghassemi, Fereidoun - White, Ian
