Guitar music in a variety of styles, yet reflecting a single underlying aesthetic. That aesthetic has something to do with freshness and liveliness, favoring tastefulness over virtuosity and intelligence over cliché. 17 MP3 Songs FOLK: Fingerstyle, CLASSICAL: Early Music Details: Bart Hopkin has been playing solo guitar in live performance and recording situations since forever. Hes also a designer and builder of unusual musical instruments, director of the organization called Experimental Musical Instruments, and author of several books and CDs featuring unusual instruments. This CD, being a collection of guitar music, doesnt have much in the way of far-out instruments, but it does feature several distinctive-sounding guitars that Bart has made. Bart trained as a classical guitarist, and this CD includes three classical pieces: a couple written for early guitar, and a guitar transcription from one of the Bach violin partitas. But most of the material on here is not classical. It comes from all over the place theres some folky stuff, some standards, some things that Bart himself wrote. Barts particular musical perspective is the unifying element. The music is distinctive fresh, tasteful and intelligent; warm enough yet spicy enough.
